

## OPEN DEFECTION FREE STATUS UNDI CONSTITUENCY

### Individual sanitary latrines in the part of cleanliness and Swach Andhra Pradesh and smart Village:

60 per cent of all open defecation in the world takes place in India. Poor sanitation causes serious health and hygiene hazards. It also leads to infant mortality, malnutrition and deficiencies in cognitive and development ability. Undi constituency is not exemption of this. There is need of 20,000 toilets. Means the constituency has shortage of 39% to achieve complete 100% targets.

His objective is to achieve to make his Undi Constituency to become the First OPEN DEFECTION Status (ODs) by 2017 March.

**“Has it ever pained us that our mothers and sisters have to defecate in open? Poor womenfolk of the village wait for the night; until darkness descends, they can't go out to defecate. What bodily torture they must be feeling, how many diseases that act might engender. Can't we just make arrangements for toilets for the dignity of our mothers and sisters?” — Narendra Modi**

The Honorable Chief Minister of Andhra Pradesh Sri Nara Chandra Babu Naidu Garu has making many steps and giving many incentives and trying hard to declare to achieve Open Defecation Certificate to Andhra Pradesh State

Narendra Modi aptly said why Girl child Education is very low in the Rural Areas. In his speech at Jammu& Kashmir “When the girl student reaches the age where she realizes this *lack of female toilets in the school* she leaves her education midway. As they leave their education midway they remain uneducated. Our daughters must also get equal chance to quality education. After 60 years of independence there should have been separate toilets for girl students in every school. But for the past 60 years they could not provide separate toilets to girls and as result the female students had to leave their education midway”.

V.V. Sivarama Raju always says that most of the children don't have toilets and latrines in their homes. Most of the Children never use soaps to clean their hands in villages. The Villagers never use Slippers for using the toilets. They are unaware of the safe behaviors.

"Children and elders are accustomed to defecating them in the open. They are feeling it is correct. We have to change their attitude and make them the importance of using the Toilets. The Villagers have problems of funds to construct the toilets."

He says in his meeting and in private conversations that in the Delta area everybody uses cell phone most probably Smart Phone but most of the people do not use individual sanitary latrines. This is their attitudinal problem rather than financial issue" He organized many awareness programs in and around the constitution to change the attitude of Rural Masses.

He has conducted a Micro level Survey of Households in the constituency. There are nearly 78,128 households. There nearly 2, 74,175 people are living. There are 20,000 individual toilets are required in the constituency. Now 4000 IHSL's are completed in the resent drive. Still 16,000 toilets are needed to construct. Now the Government is giving Rs 15,000 for each toilet. But villagers are not showing any interest.

Siva Rama Raju garu has planned to construct around 16000 IHSL's on war footing basis. He identified one central place for each mandal and trying to dump entire material for the construction of the ISL's. He has identified Engineering Civil students and NGO's around his Constituency and entrusted the supervisory work to complete the ISL's in stipulated time. His ideas are they can have work experience also. He wants eliminate the middle man in the work; it saves money for the beneficiary.

The Construction of Toilets brings about an overall improvement in the health status and quality of life in the rural areas. This generate bottom up demand for sanitation facilities through awareness creation and health education. This project eliminates open defecation to minimize risk of contamination of drinking water sources and food.
